A Classic Definition of “Strategy”...

“Strategy is the direction and scope of an organization over the long-term: which achieves advantage for the organization through its configuration of resources within a challenging environment, to meet the needs of markets and fulfill stakeholder expectations.”

Strategic Planning Process, defined

• Process by which guiding members of an organization envision and develop its future
  – What we do, How do we do it, for Whom, Where do we excel?
• Demonstrates leadership and direction
• Insulate from competitive forces, exploit skills and resources
• Program for planned growth, development and continuation of the firm
• Figuring out what we should do about the relatively few things that are essential
• Requires commitment – litmus test for implementation
Strategic Planning Objectives

• Build a group of senior leaders who think long term – beyond today’s projects – transcends day to day

• Choose the best direction for the future; build capabilities to respond to changes; build the foundation for future success

• Develop internal ideas and brainstorm on future initiatives that will drive the company – outperform the competition

• Address hurdles to achieving long-term company goals
Why Strategic Plans Have Value

• No good deal lasts forever

• Communicates a common vision of success

• Defines priorities: Important vs. URGENT

• Shapes culture, modifies behavior

• Places hard work on the right path to coincide with opportunity
Understanding Strategy: 8 Quick Questions (1 of 2)

1. Where is (and should) the business trying to get to in the long-term? (Direction)

2. Which markets does (and should) the business compete in? (Markets)

3. What kind of activities are involved in such markets (existing and future)? (Scope)

4. What must the business do to perform better than the competition in those markets (existing and future)? (Advantage)
5. What resources are required in order to compete in those markets (existing and future) - skills, relationships, capital, etc.? (Resources)

6. How should those resources be organized and deployed in those markets (existing and future) - particularly scarce ones? (Configuration)

7. What external factors affect the business’s ability to compete in those markets (existing and future)? (Environment)

8. What are the values / expectations of those who have power in and around the business? (Stakeholders)
Process

• **Assess**
  – Analysis and review of existing organization and external factors

• **Decide**
  – Formulate and craft strategy
  – Key goals, strategies and actions

• **Do**
  – Implement and communicate
  – Accountability and feedback to assess implementation

Communication Plan: “The Single Biggest Problem In Communications Is The Illusion That It Has Taken Place.” - George Bernard Shaw

- A brilliant plan poorly communicated is bound to go unimplemented.
- We will work collaboratively to develop a communication strategy and associated tactics to ensure the team maximizes the roll-out process for the corporate strategy.
- The purpose is to improve employee engagement and regain the excitement and “connectivity” that employees used to feel with respect to the company.
