ACE Virtual Series SCHOLARSHIPS 12.3.2020	Q&A Report:
Questions	**Answers**
I am noticing that none of our past Boston affiliate scholarships have been awarded, per the database. Can/should I do that after the fact?	This is only possible if the scholarship module was used in those past years. It is not required that you mark the winners there either. It is an optional feature that can be used if you think it would be helpful internally. ,It should be noted that when a student is "awarded" a scholarship in the database, it shows on their profile and is searchable in the student search area. So it's a great way to track historical winners.
Will the presentation materials be made available to attendees after the webinar?	Yes, the link to the affiliate virtual meeting recordings: https://acementortools.org/virtual/#webinars
We are have a huge issue with what criteria we are basing the scholarship on. Since attending meetings was the major requirement and deciding factor. What are other affiliates basing their awards on?	The ACE Tools section on scholarships has a lot of great info on best practices for scholarship criteria, The students that attended any of the National ACE Ventures or other ACE activities/events outside of the regular sessions could also be used as criteria.
Where do we 'track awards' in the database - Diana just said this. Can you go over where we report this? I have all awards info for the past 15 years on a spreadsheet. I could get that over to you?	In the 'view applicants' we have a simple system for indicating a student was awarded the scholarship. This would only work for scholarship records that used the database's scholarship application.
Several questions related to national scholarship: What is the target number of scholarships and approximate amount to be awarded in 2021. Confirm affiliates can have one applicant for college and one for trades. Confirm ACE National is handling the disbursement of CMiC scholarships. Still must be seniors with 2 years in ACE? Any changes in submission criteria or questions from previous years?	The number of scholarships and amounts will be similar to previous years. Yes - affiliates can nominate one student for the college path and one for an alternative path. ACE National will handle the disbursement and tracking of the CMiC Scholarships. Nominees must be current seniors registered in the database with at least one previous year of 'ACTIVE' ACE participation.
