

ACESUMMER CAMP 2024

Join the College of Architecture and Planning, in partnership with the ACE Mentor Program, **July 6-13 or July 20-27** for a summer camp in the heart of downtown Denver. Instructors from the Architecture Department will lead students in an investigation in design, digital fabrication, and sustainability, culminating in the design and fabrication of a final design build project.

LIFE AS A COLLEGE STUDENT

Campers will stay in CU Denver's new residential hall where they'll experience dorm living, eat meals in the dining hall, and enjoy the Wellness Center and other campus amenities. Along with working in studio and labs with experienced instructors and engaging with current undergrad and grad students, campers get a glimpse into college life.

DESIGN BUILD PROJECT

Using digital modeling, laser cutters, 3D printers and hand tools, students will be building a project of their design. Past projects have included rooftop furniture, indoor furnishings and installations for the College of Architecture and Planning, outdoor workspaces, vertical cities and more.

SCHEDULE

Lodging	Lodging and dining in the on-campus residential hall
Days	Workshops on Architectural Design, Red Rocks Amphitheater, Mountain Sketch Hike, Site Tours, Guest Lectures, Design Build Project
Evenings	Bowling, Amusement Park, 16 th Street Mall, Meow Wolf Movie Nights and Other Social Activities

APPLICATION PROCESS

Contact your team leader/mentor for info on the application process. There are a limited number of spots available.

The cost of registration is \$1,700. Scholarships are available to cover the full registration fee and travel costs for ACE mentees.
