

GUIDELINES FOR USING A.I.

ACE MENTOR PROGRAM
ARCHITECTURE • CONSTRUCTION • ENGINEERING

ETHICAL USE & CAUTIONS

FOR VISUAL CONTENT

USE A.I. FOR DESIGN INSPIRATION

LEARN AND GET INSPIRED...DON'T SIMPLY COPY & PASTE

AI is a great tool for learning, exploring ideas, and getting inspired. It can help visualize layouts, styles, or creative directions when you're communicating an idea. That said, AI should be used as a reference point—not a shortcut. Always build from inspiration rather than copying and pasting outputs directly into final designs.

PROTECT THE ACE MENTOR BRAND THROUGH AN OFFICIAL REDESIGN

OUR BRAND IS NOT OPTIONAL!

Our brand is not optional. AI can easily distort branding, from logo usage to colors, fonts, and imagery. Any AI-influenced design must be reviewed and adjusted to align with official ACE Mentor branding. Before anything is shared or published, confirm it reflects our approved visuals and protects the integrity of the brand.

MAINTAIN CREATIVE OWNERSHIP

DESIGN WITH CAUTION! MAINTAIN A HUMAN TOUCH.

AI can support the creative process, but it should never replace it. We expect designers and creators to lead with intention, originality, and a human touch. Every final piece should reflect thoughtful decisions and feel authentically ACE Mentor—not auto-generated.

REVIEW BEFORE PUBLISHING

USE AI RESPONSIBLY BECAUSE ALL WORK MUST FOLLOW BRANDING!

Use AI responsibly and always review work before publishing. Double-check accuracy, branding, and overall quality to ensure it meets our standards. Everything we share represents ACE Mentor, so it's critical that all content—AI-assisted or not—follows our branding and feels polished, consistent, and on mission.

*When in
doubt, Ask!*

If in need of assistance, please contact ACE National at
